

## Useful sites for training

---

In this Safety Card a number of useful sites are listed for the facilitation of the EHS professionals whose difficult job is usually linked to providing effective training to all personnel.

EHSEC's intention is no way connected to the promotion of any sites, their contents and/ or any commercial activity that may be linked to these sites other than for information purposes of its members. Some sites may require or may prompt the visitor to subscribe in order to get regular information through newsletters; this is a decision that remains at the user's discretion to make and EHSEC in no way encourages or discourages the reader from doing so.

- <https://www.atlantictraining.com/blog/free-safety-powerpoints/>

An excellent site with hundreds of free powerpoint presentations on a large variety of issues. However, since this site is powered by a training company, they will prompt the user to subscribe to their newsletter and then send promotional material for purchasing training packages.

- <http://safetyawakenings.com/free-workplace-osh-safety-power-point-points-2/>

Again another safety training site with scores of presentations on safety issues as well as useful material.

- <http://www.mikestrawbridge.com/safety-resources>

A site with useful information on the most popular topics used in safety training.

- <https://www.worksafebc.com/en>

One of the most popular HSE website of British Columbia Canada; most of the professionals are aware of the very strong promotional spots on H&S issues some of which have receive awards; a huge resource you definitely must be aware of

- <https://boilersinfo.com/books/hse-books/>

A huge resource of HSE material as well as powerpoint templates and material including e-books that are available for downloading, absolutely free

- <http://memolition.com/2014/12/03/safety-oh-they-just-dont-care/>

An excellent resource for H&S violation pictures

- [http://www.guy-sports.com/humor/videos/safety\\_at\\_work.htm#Safety\\_at\\_the\\_Workplace](http://www.guy-sports.com/humor/videos/safety_at_work.htm#Safety_at_the_Workplace)

A less rich site for pictures, cartoons and other useful material that could be used in powerpoint presentations

- <https://www.fotosearch.com/photos-images/safety.html>

A H&S clipart site with thousands of cliparts including a large variety of H&S ones

- <https://www.napofilm.net/en/napos-films/films>

A H&S training session might as well become more vivid if the trainer includes films; this is the official site of the EU-OSHA NAPO character that includes a lot of safety promotional videos that do not need either dubbing or subtitles as the characters use pantomime

- <https://www.csb.gov/videos/>

An excellent website where one can find serious chemical process plant accident investigations on video simulations where the causes are explained and measures recommended
